SECURE & CENTRALLY MANAGED,  
ON-DEMAND WEB-TO-HOST APPLICATION ACCESS

WebConnect Pro Series InterConnect Plus/Lite Thin Clients Desktop Virtualization Green Computing

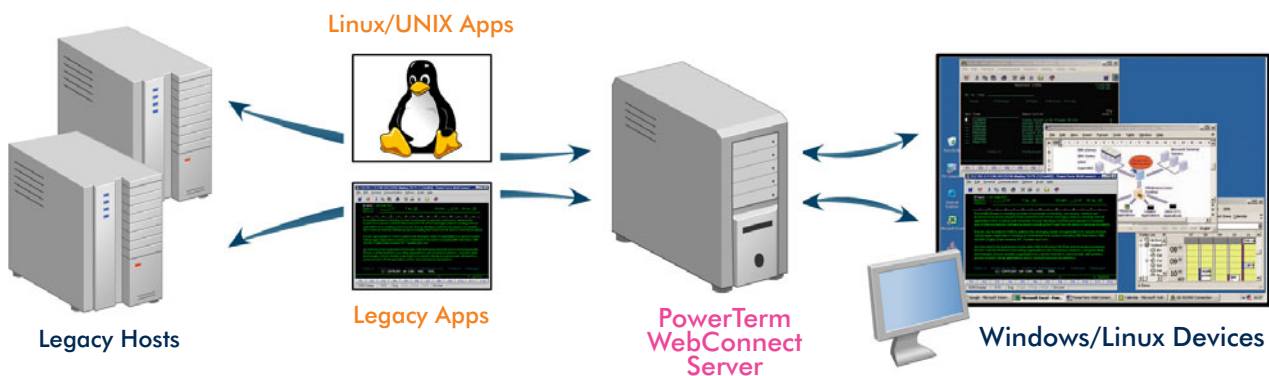

Ericom® PowerTerm® WebConnect HostView combines all the benefits of PC-to-host connectivity with all the advantages of a server-based solution. Secure and centralized deployments, updates, and administration of users, along with support for over 35 terminal emulation types, make PowerTerm WebConnect HostView an ideal and cost-effective solution for companies with multiple locations and numerous local/remote users.

## KEY BENEFITS

- **Access anytime, anywhere** using a standard Web browser
- **Lower TCO** by minimizing IT complexity, and reducing the costs of individual licensing
- **Optimize and extend** the life of legacy hosts and applications
- **Increase operational efficiency** via centralized software deployments and remote access, enhancing productivity levels and improving IT management
- **Maximize security** of critical business applications and data with real-time intruder monitoring, logging, event recording and audit trails
- **Easily troubleshoot** with real-time Remote Desktop Support, eliminating the need for IT staff to visit individual desktops

## KEY FEATURES

- **Centralized configuration management** frees IT from reconfiguring users who access legacy applications from different clients or locations
- **Enhanced security features** include SSL; SSH; Active Directory / LDAP integration; and Single Sign-On (including Kerberos)
- **Cross-platform capabilities** enable PowerTerm WebConnect HostView to run on Linux as well as on Windows servers
- **Multi-platform client support** enables users to connect from Windows and Linux devices as well as from any Java-enabled client
- **Session reconnect** allows the user to automatically resume work from the point of disconnection, without having to repeat the login process

Secure, centrally managed application access via a Web browser – PowerTerm WebConnect HostView
